## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 17 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,336,979 B1 (Sugawara, et al.).

Sugawara, et al. discloses wear-resistant copper-tin-oxygen coatings on a copper-tin diffusion layer. The copper-tin-oxygen coating layer enhances the wear resistance and slipping property in conjunction with the adjacent copper-tin diffusion layer for articles of manufacture which require a surface having excellent hardness, contact resistance, bending workability, adhesion, and terminal insertion force. Sugawara, et al. states that such articles of manufacture include connectors utilized in electrical equipment. The coating layer disclosed by Sugawara, et al. can consist of a Cu-Sn-O material wherein there are no particular limitations to the proportions of any component elements (for example, Cu, Sn, and O). See lines 6 to 33 in column 2, lines 16 to 26 in column 5, and lines 14 to 51 in column 6. It is well settled that when a claimed product appears to be substantially the same as a prior art product, the burden is on the applicant to prove that the product of the prior art does not necessarily or inherently possess characteristics attributed to the claimed product. See *In re Spada*, 911 F.2d 705, 708, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990); *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977).
